The above chart shows a large decrease in the number of reports from 2007 to 2009.  
This is a result of an economic slow down and an increase in unemployment levels.

This year there is also a significant decrease in new hires filed electronically.

This is a result of the New Hire direct upload application online.

Employers were able to start uploading their new hires online in December of 2008

The new hires once reported electronically are now being filed on the internet.
